

Congratulations and thanks for your purchase! We have tried to make the assembly instructions as clear and concise as possible so you can get on with enjoying your tent quickly and with minimal fuss.

We've also included some tips on how to prolong the life of your tent – if you follow this advice, you will be able to enjoy your tent for years to come!

### **Tent Assembly Instructions: DRACONIS**

Fiberglass poles:

- Extend all fiberglass poles and lay them down on the ground.

Rain Fly:

- Lay the rain fly as flat as possible on the ground.

Assembly:

- Insert each pole into 1 sleeve of the fly from one end to the other.
- At the end of each tent pole, insert the metal pins (found along the bottom edge of the rain fly) into both ends of each tent pole
- The rain fly is now standing up by itself, which can be secured by anchoring down with steel stakes at the PP webbings, located at the edges of the fly.
- Tension of the fly can be adjusted by the guy ropes and buckles on the PP webbings joining both sides of the fly.

Inner tent:

- Take an inner tent inside the assembled rain fly to its appropriate location
- Starting from the rear of the inner tent, stake down the corners along the bottom edge of the rain fly
- Hook the inner tent to the underside of the rain fly starting from the bottom rear and work your way forward to the top using the toggles on the outer wall of the inner tent and loops running along the underside of the rain fly
- Repeat the above steps for the rest of the inner tents – you can leave some of the inner tents out to increase the living or storage capacity and to reduce the travel weight of the whole tent.

### **Caring for your tent:**

1. Keep it clean: Don't set up your tent in the mud, avoid putting muddy clothing and gear in the sleeping compartments as sand and dirt can scratch the water proof coating and damage zippers
2. UV light can accelerate fabric degradation. Therefore, set up your tent in the shade when possible and use the rain fly to protect the inner tent
3. To prolong the life of your tent floor, use a separate sheet of PE fabric underneath the tent to protect against abrasion
4. When packing up, shake out dirt and sand as much as possible
5. At home, clean your tent with a damp cloth, never use harsh cleaning chemicals, and air dry
6. When storing, allow the tent to sit loosely to prevent creases
